

# Profits Fund New Green Building Project

Energy efficiency

Wastewater recycling

Lighting efficiency

Quality indoor environmental

Used materials recycling

An organization is nothing without its community

## Innovative and sustainable green project

Our innovative and sustainable green building project will have 4 main buildings – an office, a factory, a canteen and a dormitory. The estimated total area will be 8 acres and the scope of construction will focus on the 4 buildings.

Design priorities of our green buildings will include LEED certification, energy & water efficiency, environmentally-friendly construction materials and indoor environmental quality.

We believe in better buildings; places that give our people cheerful and healthier spaces to live and work.

**Canteen**

- Medical center
- Childcare center
- Function room
- Dining area

**Factory**

- Production area
- Storage area

**Office**

- General office
- Showroom

**Dormitory**

- Bedrooms for 4-6 people
- Bedrooms for couples
- Living rooms

Building a **SENSE of 'GREEN'**

**For the Company**

- ♥ Low employee turnover
- ♥ More experienced employees
- ♥ More productive & dedicated
- ♥ High quality of work

**For our People**

- ♥ Working in hometown
- ♥ Feelings of comfort
- ♥ Avoiding homesickness
- ♥ Creating loyalty

## WHY in Nanchong, Sichuan ?

We care about our people

Over 60% of our employees are recruited locally from Sichuan. We believe that basing the project in Nanchong is a win-win scenario for all involved, offering both benefits for the community and economic opportunities.

**OUR PEOPLE OVER 60%↑** are locally from Sichuan, China

## Nanchong

Our New Green Buildings will be built in Nanchong, Sichuan province, People's Republic of China. Nanchong is the central city in the northeast Sichuan, a well-known historical and cultural city. The city is rich in natural resources, with fascinating natural scenery and unique local culture.

## The Location

Nanchong enjoys a subtropical humid monsoon climate; it is seldom snowy and frosty. The annual average temperature falls around 62.6°F.
