

Municipal Leaders of Nanchong Government Paid an Inspection Visit to PFGHL Nanchong Factory

At the beginning of the New Year, several municipal leaders of Nanchong government paid an inspection visit to the field of training for meeting the "Three Most Difficult Challenges" and check out the progress of major projects at Yilong County. PFGHL Nanchong Factory is one of Nanchong's leading enterprises. Attendees to the seventh plenum of the sixth Nanchong municipal committee, headed by Song Chaohua, Secretary of the CPC Nanchong Municipal Committee, and members of the Nanchong municipal government leadership, headed by Wu Qungang, Deputy Secretary of the CPC Nanchong Municipal Committee and Mayor of Nanchong, paid their respective visits to PFGHL Nanchong Factory, for learning more about the production operations, investment environment and industrial facilities of the Factory.

The leaders began their visit with a trip to the fashion design studio of PFGHL Nanchong Factory. Hui Yui Sang, president of PFGHL extended a warm welcome to the visiting leaders from Nanchong, and gave a basic introduction of PFGHL and PFGHL Nanchong Factory. "PFGHL is headquartered in Hong Kong. Since its footprint expanded to Sichuan in 2013, it has spent 500 million Hong Kong dollars in constructing PFGHL Nanchong Industrial Park. In 2017, we initiated the construction of a 1,000-mu organic silkworm breeding and mulberry-growing field at Huoyan Village of Dengta Township, in an all-out effort to build an entire organic clothing industry chain", stated Hui. While having a pro fashion model display high-end attire from PFGHL Nanchong Factory

manufacturer, Hui Yui Sang, the president explained in detail the exquisite production process of the Factory.

After hearing the general introduction and production process explanation of PFGHL

and PFGHL Nanchong Factory, the visiting leaders showed great interest in the status quo and core advantages of the company. Subsequently, they went to the production workshop of PFGHL Nanchong Factory, where line workers in their uniforms were seen busy with producing beautiful and

quality attire in fresh colors. "Currently, we hire more than 300 line workers on 11 fully loaded one-piece production lines. Our supplies tend to fall short of demands. We mainly serve overseas markets such as Europe and America. Workshop One went into operation last August and has achieved an output value of nearly 100 million yuan. Currently, we are intensively preparing for the start-up of Workshop Two." said Hui.

Song Chaohua stated, "This is a high-end industry! Industries are the key to business prosperity. Industries, especially manufactures play a very critical role in the development of a county. The high-end attire exporting ability of this company to European and American countries demonstrates the great contribution of industries and manufactures to a county' s economic development; headquartered in Hong Kong, the company is competitive and prospective, which makes its entry in the mainland of China consistent with the concept of 'bringing in large and outstanding enterprises' put up by the Nanchong municipal committee and government; the company is also an export-oriented enterprise, which made an export profit of 10 million US dollars in foreign currency last year, and it aims to raise the export profit to 100 million US dollars in its most immediate

goal."

Yilong County of Nanchong stands out to become PFGHL' s prospective site in the mainland of China for its emancipation of thoughts, supporting policies, as well as considerate services. Song Chaohua said, "Nanchong government will surely provide the best services, most preferential policies and most favorable environment to support immigration of outstanding and competitive enterprises. Meanwhile, we hope PFGHL will enlarge its investment and become even more competitive here in Nanchong."

During the visit, the municipal leaders of Nanchong government gave a lot of valuable advice, laying out a direction for the sustainable development of PFGHL Nanchong Factory in clothing business, and boosting

the confidence and determination of PFGHL Nanchong Factory's employees. In the future, PFGHL Nanchong Factory will employ Yilong's solid industrial foundation to expand the production scale and create more jobs, in a bid to contribute to Nanchong's economic development.
